AI images and internet rumors spread confusion about ICE agent involved in shooting

JANUARY 8, 2026 · 6:22 PM ET

HEARD ON ALL THINGS CONSIDERED

Geoff Brumfiel

An original still image (left) from an eyewitness video shows the masked ICE agent who shot Renee Nicole Good. Users on social media "unmasked" the agent using Grok (right). Experts warn that AI cannot "unmask" individuals. NPR is publishing both images to show how AI is being used to manipulate images of news events.

Hany Farid

CEO, Get Real

The Liar’s Dividend

Deepfakes don't just create false evidence.

They make real evidence deniable.

- Chesney & Citron — California Law Review, 2019

25% Human Deepfake Detection

(Deepstrike, 2025)

UC Berkeley Study – Can You Trust What You See?

Can you trust what you see in a video?

Not all AI models are equally detectable

376 participants

Sora 2, Veo 3.1 and Seedance 1

Movement | Hands | Faces

These cues work today. As models eliminate artifacts, every one of these signals degrades.

8 seconds — 75% ↑ +17pts

50% = chance

Human Resilience – What Should We Be Asking?

~~Is this a deepfake?~~

Train Users to Follow Verification Procedures

Layers of Detection

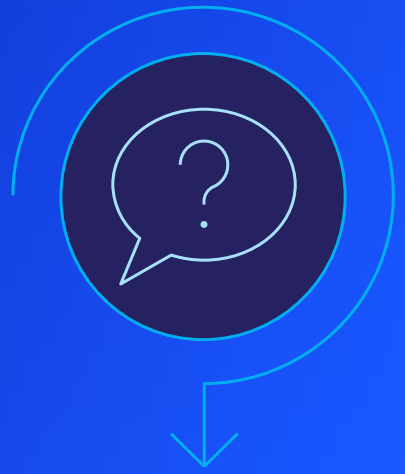

Verify

Confirm the media content

Source

Consider the source and determine identity

Question

Challenge the validity of the video / audio

Monitor

Observe media streams for potential deepfakes
